Valentín Flórez Arbeláez

Full-Stack & Context Engineer · Medellín, Colombia (ET / UTC−5)
Target: Full Stack Engineer — Music Expression (Spotify)

portafolio-valentin.vercel.app · Aberamentho / Pleroma Music · Glorian / EOS System

SUMMARY

Full-stack engineer at the intersection of music technology, scalable web platforms, and spec-driven architecture. Ships React/TypeScript experiences and typed API contracts in production; operates multi-project fleets under fail-closed verification; focused on how artists and fans connect through interactive audio/visual product surfaces. Actively transferring hexagonal/SOLID backend craft into Java / JVM for Spotify-scale service work.

SELECTED PRODUCTION WORK

Aberamentho / Pleroma Music Engine — Music & Audio DSP Full Stack

Live: aberamentosprelomamusic.vercel.app · Next.js, React, TypeScript, Web Audio API

- Dual-deck DJ-style mixing with Camelot harmonic synthesis (1A–12B).
- Browser audio DSP pipeline and performance-conscious UI for real listening workflows.
- Product narrative aligned with artist→fan expression beyond a static track list.

Glorian / EOS System — Engineering Control Plane (DX & Architecture)

Live: eos-system-ten.vercel.app · Pure TypeScript/Node Layer-0, MCP, SDD (EARS/BDD)

- Spec-Driven Development with strict automated verification and fleet Soundcheck-style gates.
- Hexagonal purity, evidence receipts, and institutional engineering governance concepts.
- Raises Developer Experience and architectural consistency across a production fleet.

Portfolio Platform — Engineering Brand

Live: portafolio-valentin.vercel.app · React/TypeScript on Vercel

- Production showcase of commercial web platforms and interactive CV.

ATP Strength & Fleet Backends — API / Systems Discipline

Live: atp-strength.vercel.app · TypeScript/Node, Python (FastAPI), Go across fleet

- Automated test discipline and clean domain boundaries transferable to Java service design.
- Contract-first APIs and pragmatic product delivery under verification gates.

SKILLS (MUSIC EXPRESSION MAPPING)

Frontend / SDKs	React, TypeScript, Next.js, typed client contracts, Web Audio, production UX
Backend	Node.js/TypeScript, Python/FastAPI, Go · Java/JVM ramp in progress (architecture transferable)
Architecture	Hexagonal / Clean Architecture, SOLID, API design, Spec-Driven Development
Quality / DX	TDD/BDD, fail-closed gates, MCP tooling, Soundcheck-aligned governance
Domain	Music/DJ culture, harmonic mixing, artist–fan interactive experiences

AVAILABILITY

- Timezone: Eastern Time compatible (Medellín, UTC−5).
- Open to discussing Spotify hiring location / work authorization for this US-posted role.
- Application materials in English.

WITHIN_TESTED_SCOPE · Public production URLs only · Not a claim of Spotify employment.
